

OKV Inventory Management System

Online Edition — Staff / Team Member Manual

A quick guide for day-to-day use: signing in, POS, Customers, stock, orders, and Team Chat.

1. Signing In

Your Admin will share an install link and a username/password with you. Open the link, install the app to your home screen if you like, then sign in with your username and password. If you ever forget your password, there's no self-service reset for staff accounts — ask your Admin to set a new one for you from Team & Access.

To sign out, use **Log Out** in the sidebar, or tap your avatar (top-right) and choose Log Out.

Note: Your Admin controls exactly which of the sections below you can see, based on your assigned role(s). If something you need is missing, ask your Admin.

2. What You Might See

- **Dashboard** — a quick overview. Everyone sees this.
- **Sales Entry (POS)** — ring up sales with live totals and printable/downloadable receipts.
- **Sales Orders** — record and track customer orders.
- **Customers** — the customer list: contact details, credit limit, balance, birthday/anniversary.
- **Current Inventory / Stock In / Stock Out / Adjustments / Batch & Expiry** — stock movement and tracking.
- **Reorder Alerts** — items running low, with a badge showing the count.
- **Purchase Orders / Suppliers** — purchasing side of the business.
- **Product Master / Scan Barcode** — the product catalog and barcode lookup.
- **Expenses / Profit & Loss / Reports** — the finance side (Reports needs the Growth plan).

3. Message Members

If your role includes customer-facing access (Sales Officer, Cashier/POS Operator, Store Manager, or Inventory Super Admin), you can send customers announcements, personalized notes, or birthday/anniversary greetings by Email, SMS, or WhatsApp from the **Message Members** page. Pick who to message, write your note (use `{{name}}` to auto-insert each customer's name), choose a channel, and send.

4. Team Chat

Use **Team Chat** to message your Admin directly — for questions, stock issues, or anything else that needs their attention. Your conversation is always with your organisation's Admin. Type your message and press Enter or tap the send button; the thread refreshes automatically every 20 seconds.

5. Working Offline

The app keeps working with no internet connection — you can still record sales, update stock, and more. Everything syncs automatically the moment you're back online, and a status dot in the top bar shows Offline / Syncing... / Synced. Team & Access, Message Members, Team Chat, and Upgrade & Subscription need a live connection since they talk to other people directly.

6. Getting Help

For anything this manual doesn't cover, start with your Admin — they manage your account and access. For technical issues with the app itself, OKV Technology Consults is also available directly:
